This purpose of this forum is to assemble geoscientists in one, pleasant place, to share their progress in exploration, mining and research over the past year.

This is not a conference for spruiking the share price. It is for sharing results and ideas in the geosciences and learning more about geology, in particular the geology of Tasmania (especially through some well-chosen field trips). It is also very much about camaraderie (not "networking") and enjoying the company of other people who are interested in geology.

The conference presentations will be on Thursday 5th December and the Forum Dinner will be on Thursday evening

On Friday 6th December there will be a choice of excursions. Forum participants may select one excursion from both the morning and afternoon programs but numbers are limited. The cost of excursions is covered by the registration fee, but transport and meals for the 6th will have to be provided by the participants.

The excursions are as follows:

AM1 Mt Bischoff Tin Mine, Waratah
(limit, 20 persons)

AM2 Palaeozoic Geology of the Sheffield District
(limit, 20 persons)

AM3 Stormont gold-bismuth deposit
(limit 20 persons)

PM1 Firetower gold prospect, Gog Range
(limit 20 persons)

PM2 Kara iron-tungsten mine, Hampshire
(limit 20 persons)
